Product Description

What We Can Provide

OEM Custom Brass Turning Parts Milling Machining Metal Brass CNC Prototype Parts Manufacturer

Description Of Brass Turning Parts

CNC machining is a subtractive manufacturing process. First, a piece of metal or plastic material is machining through a machine, which we call CNC machining center. The machine uses various sharp rotating tools or knives to remove excess materials and cut or form the required products. This is a complex process. The rotation speed of the machine spindle, the cutting depth, the forward speed of the tool, etc. all these will affect the quality of the machined parts.

Specification Of Brass Turning Parts
