Product Description

What We Can Provide

High Precision CNC Milling Brass Parts Service Custom Quality Brass Fabrication Manufacturer

Description of CNC Milling Brass Part

CNC machining is a subtractive manufacturing process. First, a piece of metal or plastic material is machining through a machine, which we call CNC machining center. The machine uses various sharp rotating tools or knives to remove excess materials and cut or form the required products. This is a complex process. The rotation speed of the machine spindle, the cutting depth, the forward speed of the tool, etc. all these will affect the quality of the machined parts.
