

## OEM Customized CNC Metal Machining Parts Polishing Anodizing Plating Surface Treatment

### Our Product Introduction

For more products please visit us on [cnc-metalmachining.com](http://cnc-metalmachining.com)

#### Basic Information

- Place of Origin: Shenzhen China
- Brand Name: Xiange
- Certification: ISO9001:2015
- Model Number: CNC-Metal-034
- Minimum Order Quantity: 1 pcs
- Price: USD \$0.1-\$1.99
- Packaging Details: Carton, As Customers' packaging requirements
- Delivery Time: Samples 7-10 days, Mass production 20-25 days
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 10000 pcs per week

#### Product Specification

- Tolerance:  $\pm 0.01\text{mm}$
- Surface Treatment: Polishing, Anodizing, Plating, Heat Treatment, Etc.
- Material: Metal
- Package: Carton, Wooden Case, Etc.
- MOQ: 1 Piece
- Drawing Requirement: Detailed
- Service: OEM/ODM
- Lead Time: 7-15 Days
- Highlight: Polishing CNC Metal Machining Parts, Plating CNC Metal Machining Parts, Anodizing CNC Metal Machining Parts

## Product Description

### What We Can Provide

#### Product Description:

Our company provides metal CNC machining products, precision metal machining parts, and customized metal machining parts with high quality. Our products are made by advanced CNC machining equipment with a drawing format of CAD, PDF, JPG, etc. The size of the parts is customized according to the customer's drawing requirements. To ensure the quality of the parts, we provide surface treatment such as polishing, anodizing, plating, and heat treatment. Customers can choose from express, air, and sea shipping methods. Our metal CNC machining products are of the highest quality and accuracy. Our engineers have years of experience in metal machining. We can provide customized metal machining parts according to the customer's drawings. We have a complete quality control system and strict testing process to ensure that every product meets the customer's requirements. Our goal is to provide customers with high-quality machined metal parts.

#### Features:

Product Name: CNC Metal Machining Parts

Shipping Method: Express, Air, Sea

Service: OEM/ODM

Material: Metal

Drawing Format: CAD, PDF, JPG, Etc.

Surface Treatment: Polishing, Anodizing, Plating, Heat Treatment, Etc.

#### Technical Parameters:

| Technical Parameter | Description   |
|---------------------|---|
| Tolerance           | ±0.01mm   |
| Surface Treatment   | Polishing, Anodizing, Plating, Heat Treatment, Etc. |
| Material            | Metal   |
| Application         | Automotive, Aerospace, Medical, Etc.                |
| Processing          | CNC Machining                                       |
| Drawing Format      | CAD, PDF, JPG, Etc.                                 |
| Shipping Method     | Express, Air, Sea                                   |
| Package             | Carton, Wooden Case, Etc.                           |
| Drawing Requirement | Detailed  |
| MOQ                 | 1 Piece   |

#### Applications:

CNC Metal Machining Parts are widely used in many industrial applications. These metal machining parts are manufactured with Computer Numerical Control (CNC) technology, providing precise custom machining solutions for clients. With a wide range of materials, including aluminum, steel, brass and stainless steel available, CNC Metal Machining Parts can be customized to meet the specific requirements of the customer. OEM/ODM services are available, with drawings accepted in CAD, PDF, JPG, etc. formats. The lead time for CNC Metal Machining parts is 7-15 days, and the tolerance of the machining parts is  $\pm 0.01$ mm. CNC Metal Machining Parts are an ideal solution for almost any application, providing high quality and reliability for a wide variety of industrial needs.

### Customization:

We provide OEM/ODM service for CNC Metal Machining Parts, Metal CNC Machined Components, Computer Numerical Control Metal Machining Parts. Our machined parts are made of metal with short lead time of 7-15 Days. The package can be carton, wooden case or customized. We can also customize the size of the parts according to your needs.

### FAQ:

**Q:** What materials are CNC metal machining parts made from?

**A:** CNC metal machining parts are made from a variety of metals, including aluminum, steel, brass and titanium.

**Q:** What is the lead time for CNC metal machining parts?

**A:** The lead time for CNC metal machining parts depends on the complexity of the parts and the size of the order. Typically, lead times are between 1-2 weeks.

**Q:** Are CNC metal machining parts customizable?

**A:** Yes, CNC metal machining parts are highly customizable and can be made to meet specific sizes, shapes and tolerances.

**Q:** What is the typical surface finish for CNC metal machining parts?

**A:** The typical surface finish for CNC metal machining parts is dependent on the material and application, but can range from as-machined to mirror finish.

**Q:** Are CNC metal machining parts cost-effective?

**A:** Yes, CNC metal machining parts are cost-effective and offer a high level of quality and precision at an affordable price.
