

Custom Turning Milling Cnc Brass Parts Metal Auto Spare Machining High Precision

Our Product Introduction

for more products please visit us on cnc-metalmachining.com

Basic Information

- Place of Origin: Shenzhen China
- Brand Name: Xiange
- Certification: ISO9001:2015
- Model Number: BS-CNC-042
- Minimum Order Quantity: 1 pcs
- Price: USD \$0.1-\$1.99
- Packaging Details: Carton, As Customers' packaging requirements
- Delivery Time: Samples 7-10 days, Mass production 20-25 days
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 10000 pcs per week

Product Specification

- Cnc Machining Or Not: CNC Machining
- Type: Milling, Turning, Machining
- Material Capabilities: Copper, Aluminum, Bronze, Stainless Steel, Brass
- Surface Treatment: Anodized, Anodizing, Anodize/natural, Sandblast, Silk-screen
- Application: Machinery, Automotive, Laptop, Industrial Equipment, Engineering
- Tolerance: 0.01mm, 0.05 Mm, +/-0.005, 0.003-0.05mm
- Service: OEM/ODM, OEM ODM Metal Stamping, Customized OEM OEM ODM, OEM Service
- Color: As Per Customers' Requirement
- Keyword: CNC Milling Brass Parts
- Sample: Acceptable
- Highlight: **custom turning milling cnc brass parts,
auto spare cnc brass parts,
custom turning milling machined brass parts**

Product Description

What We Can Provide

High Precision Custom CNC Turning Milling Metal Brass Auto Spare Machining Parts

Description of High Precision Brass Milling Turning Parts

Precision CNC brass parts are custom-made components manufactured using Computer Numerical Control (CNC) machining processes from brass material. These parts are characterized by their exceptional precision, accuracy, and high-quality finish. Brass, a copper-zinc alloy, is a popular choice for precision machining due to its excellent machinability, corrosion resistance, and electrical conductivity. Precision CNC brass parts are widely used in various industries, including automotive, electronics, aerospace, plumbing, and more.

Material Selection: Brass is chosen for its unique properties, including corrosion resistance, electrical conductivity, and a golden appearance. Different brass alloys, such as C36000 (free-cutting brass) or C46400 (naval brass), can be used to meet specific requirements.

Specification of High Precision Brass Milling Turning Parts

Contract Manufacturing	Capabilities
Stamping&Deep Drawing	<ul style="list-style-type: none"> * Up to 1000 Tons * Tolerance: +/- 0.02mm * Materials can be stamped: metal sheet, metal strip, metal pipe, aluminum profile, metal wire mesh etc
CNC Machining	<ul style="list-style-type: none"> * We have nearly 100 CNC machining centers and CNC turning lathe that can produce precision CNC components from small to big, simple to complex; * Tolerance up to +/-0.001mm * Material can be stainless steel, aluminum, steel, brass, copper, titanium, plastic etc.
Lathe Turning	<ul style="list-style-type: none"> * We have nearly 50 turning lathes that can produce precision components from small to big, simple to complex; * Tolerance up to +/-0.005mm * Material can be stainless steel, aluminum, steel, brass, copper, titanium, plastic.
Laser Cutting	<ul style="list-style-type: none"> * Thickness steel up to 25mm, stainless steel up to 20mm, aluminum up to 12mm; * Tolerance:+/- 0.1mm * Materials can be laser cut: sheet metal steel, stainless steel, copper, brass, bronze etc. And various metal tubes.
Welding	<ul style="list-style-type: none"> * We're very skilled in aluminum, steel and stainless steel welding; * We have ABB welding robots in house; * We have high skilled welders with over 10 years welding experience. * Welding ways: Spot Welding, Laser Welding, TIG Welding, MIG Welding, Butt Welding etc
Aluminum Profiles Deep Processing	<p>We customize the aluminum extrusions from the aluminum profiles material factory. Then take to our factory for deep processing according to your design requests:</p> <p>Precision Cutting, Punching, Drilling, CNC Milling, Machining, Welding etc.</p>
Other Processings	Die Casting, Precision Casting, Drilling, Perforating, Threading, Tapping, Riveting, Knurling, Spinning, Roll Forming etc

Application Of Precision CNC Brass Parts

1. Auto Components Hardware Parts Auto Parts
2. Communication Equipment
3. Industrial Equipment
4. Medical EquipmentsMechanical Parts
5. Ship Accessories
6. Electrical Equipment
7. Mechanical Equipment

Quality Control

1. Checking the raw material after they reach our factory----- Incoming quality control (IQC)
2. Checking the details before the production line operated
3. Have full inspection and routing inspection during mass production---In process quality control(IPQC)
4. Checking the goods after they are finished---- Final quality control(FQC)
5. Checking the goods after they are finished-----Outgoing quality control(OQC)

Why Choose Us

Our Advantages

1. Small details make big difference. We promise: All the parts from our company have no sharp edge. All dimensions are controlled according to your drawings. Every product will be fully inspected and carefully packed to prevent the bump and rust in transit.
2. The craftsmanship of all parts we machined is controlled rigorously, Every product has its own process card and process chart.
3. Our quality inspection procedure is quite strict. It must self-inspected during production, we have flow inspectors and professional inspectors.
4. Each size of product must be tested one by one after completing production and provide quality report.
5. The most important point, we are the entity factory, not trading company. Price is the composition of the actual product quality price. Quality can guarantee more controllable higher than trading company. The price is competitive, at least reducing the trade company's service fee.
6. We have many years of export experience, exports to the US, Europe, Japan and other countries and regions.

CNC Punching Machine

Injection Molding machine

FAQ

Q1: Where can I get product & price information?

A1: Send us inquiry e-mail, we will contact you as we receive your mail.

Q2: How long can I get the sample?

A2: Depends on your specific items, within 3-7 days is required generally.

Q3: What kinds of information you need for quote?

A3: Kindly please provide the product drawing in PDF, and will be better you can provide in STEP or IGS.

Q4: What are the payment terms?

A4: We accept 50% as payment deposit, when the goods is done, we take photos for your check and you then pay the balance.

Q5: Are you a trading company or factory?

A5: We are direct factory with 10 experienced engineers and more than 650 employees as well approximate 2,000 square ft. workshop area.

Q6: What shall we do if we do not have drawings?

A6: Please send your sample to our factory, then we can copy or provide you better solutions. Please send us pictures or drafts with dimensions (Length, Height, Width), CAD or 3D file will be made for you if placed order.
