

Anodized Brass Aluminum CNC Machining Parts Turning Service Brass CNC Parts Supplier

Our Product Introduction

Basic Information

- Place of Origin: Shenzhen China
- Brand Name: Xiange
- Certification: ISO9001:2015
- Model Number: BS-CNC-060
- Minimum Order Quantity: 1 pcs
- Price: USD \$0.1-\$1.99
- Packaging Details: Carton, As Customers' packaging requirements
- Delivery Time: Samples 7-10 days, Mass production 20-25 days
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 10000 pcs per week

Product Specification

- Cnc Machining Or Not: CNC Machining
- Type: Milling, Turning, Machining
- Material Capabilities: Copper, Aluminum, Bronze, Stainless Steel, Brass
- Surface Treatment: Anodized, Anodizing, Anodize/natural, Sandblast, Silk-screen
- Application: Machinery, Automotive, Laptop, Industrial Equipment, Engineering
- Tolerance: 0.01mm, 0.05 Mm, +/-0.005, 0.003-0.05mm
- Service: OEM/ODM, OEM ODM Metal Stamping, Customized OEM OEM ODM, OEM Service
- Color: As Per Customers' Requirement
- Keyword: CNC Milling Brass Parts
- Sample: Acceptable
- Highlight: **Anodized Brass CNC Parts, Brass CNC Parts Supplier, Aluminum Turning Brass CNC Parts**

Product Description

What We Can Provide

CNC Machining Parts Anodized Brass Aluminum Turning Service Brass CNC Parts Supplier

Description of OEM Custom Precision Metal Brass Parts Copper CNC Machining Parts

CNC Machining Parts Anodized Brass Aluminum Turning Service refers to a comprehensive service that specializes in the machining and finishing of brass and aluminum parts using CNC (Computer Numerical Control) technology.

CNC Machining: CNC machines are precision tools that utilize computer-aided programs to control the movement of cutting tools. They are capable of achieving high accuracy and repeatability in the machining of various materials, including brass and aluminum.

Anodized Finish: Anodizing is a surface treatment process specifically for aluminum. It involves electrolytically coating the aluminum with a protective oxide layer, which not only enhances corrosion resistance but also allows for the application of dyes to create decorative finishes. This process can give aluminum parts a durable and attractive appearance.

Brass and Aluminum Materials: Brass and aluminum are commonly used materials in CNC machining due to their unique properties. Brass is known for its corrosion resistance and good machinability, while aluminum is lightweight, corrosion-resistant, and thermally conductive. Both materials can be easily worked with CNC machines to create complex parts and components.

Specification of OEM Custom Precision Metal Brass Parts Copper CNC Machining Parts

| | |
|----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Business Type | CNC Machined Parts Factory / Manufacturer |
| Service | 1. CNC Machining 2. Turning and Milling 3. CNC Turning 4. OEM Parts |
| Material | Aluminum: 5052,6061, 6063, 6082,7075-T etc 2. Steel: 4140, Q235, Q345B, etc. 3.Titanium: TA1,TA2/GR2, TA4/GR5, TC4, TC18,etc. 4.Stainless steel: 303,304,316L, etc. 5.Brass: C36000 , C37700 , C26800, C22000 etc 6.Plastic:Pom,ABS,Nylon,etc. |
| Main Equipment | CNC Machining center(Milling), CNC Lathe, Grinding machine |
| Treatment | Sandblasting, Anodize color, Blackening, Zinc/Nickl Plating, Polish,,Passivation PVD, Titanium Plating,Electrogalvanizing,electroplating chromium, electrophoresis, QPQ(Quench-Polish-Quench),Electro Polishing,Chrome Plating, Knurl,Power coating,Laser etch Logo, |
| Tolerance | ±0.01mm~±0.05mm |
| Drawing format | STEP,STP,IGES,CAD,PDF,DWG,DXF etc or samples. |

Application Of OEM Custom Precision Metal Brass Parts Copper CNC Machining Parts

1. Auto Components Hardware Parts Auto Parts
2. Communication Equipment
3. Industrial Equipment
4. Medical EquipmentsMechanical Parts
5. Ship Accessories
6. Electrical Equipment
7. Mechanical Equipment

Quality Control

1. Checking the raw material after they reach our factory----- Incoming quality control (IQC)
2. Checking the details before the production line operated
3. Have full inspection and routing inspection during mass production---In process quality control(IPQC)
4. Checking the goods after they are finished---- Final quality control(FQC)
5. Checking the goods after they are finished-----Outgoing quality control(OQC)

Why Choose Us

Advantages

1. Quality control: the defective products rate is 0.1%. Imported material 100%.
2. Reasonable price. Precision made. Experience & reasonable QC that you can rely on.

3. Each part would be given 100% test and tryout before shipment.

4. Adequate supply capacity. Punctual delivery time.

FAQ

Q1: Where can I get product & price information?

A1: Send us inquiry e-mail, we will contact you as we receive your mail.

Q2: How long can I get the sample?

A2: Depends on your specific items, within 3-7 days is required generally.

Q3: What kinds of information you need for quote?

A3: Kindly please provide the product drawing in PDF, and will be better you can provide in STEP or IGS.

Q4: What are the payment terms?

A4: We accept 50% as payment deposit, when the goods is done, we take photos for your check and you then pay the balance.

Q5: Are you a trading company or factory?

A5: We are direct factory with 10 experienced engineers and more than 650 employees as well approximate 2,000 square ft. workshop area.

Q6: What shall we do if we do not have drawings?

A6: Please send your sample to our factory, then we can copy or provide you better solutions. Please send us pictures or drafts with dimensions (Length, Height, Width), CAD or 3D file will be made for you if placed order.
