

Custom Stamping Metal Stainless Steel OEM Sheet Metal Fabrication Laser Cutting Bending Shell Producer

Our Product Introduction

for more products please visit us on cnc-metalmachining.com

Basic Information

- Place of Origin: Shenzhen China
- Brand Name: Xianheng
- Certification: ISO9001:2015
- Model Number: PMS-XG-068
- Minimum Order Quantity: 1 pcs
- Price: USD \$0.1-\$1.99
- Packaging Details: Carton, As Customers' packaging requirements
- Delivery Time: Samples 7-10 days, Mass production 20-25 days
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 50000 pcs per week

Product Specification

- Material: Copper, Stainless Steel, Aluminum, Brass, Etc.
- Surface Treatment: Hot Galvanized, Zinc Plating, Nickel Plating, Powder Plating, Anodize
- Process: Stamping, Punching, Bending, Punching Of Stamping Blanks, Stamping + CNC
- Application: Construction, Industrial, Used Widely Industry Auto, Mechanical Equipment, Auto Parts
- Service: OEM/ODM, OEM ODM Metal Stamping, Customized OEM OEM ODM, OEM Service
- Tolerance: 0.01mm, 0.05 Mm, +/-0.005, 0.003-0.05mm
- Oem: Available
- Quality: ISO9001
- Keywords: Custom Stamping Metal
- Packing: As Customers' Requirement
- Highlight: Custom Stamping Sheet Metal Fabrication,

Product Description

What We Can Provide

OEM Sheet Metal Fabrication Laser Cutting Bending Custom Parts Shell Producer

Description of OEM Sheet Metal Fabrication Laser Cutting Bending Custom Parts Shell Producer

OEM Sheet Metal Fabrication, specifically involving Laser Cutting, Bending, and the production of Custom Parts and Shells, refers to a manufacturing process where a company (often referred to as an Original Equipment Manufacturer, or OEM) specializes in creating custom metal parts and assemblies according to the specifications and designs provided by their clients.

Sheet Metal Fabrication: This is the process of forming and shaping sheet metal into various components and assemblies. Sheet metal is a type of thin, flat metal material that can be easily cut, bent, and shaped into various forms. In the context of OEM manufacturing, sheet metal fabrication often involves the use of advanced machinery and techniques to ensure precision and quality.

Laser Cutting: Laser cutting is a high-precision manufacturing process that uses a focused laser beam to cut materials, such as sheet metal, with great accuracy and speed. This process allows for intricate designs and tight tolerances, making it ideal for creating complex and precise custom parts. Laser cutting is highly efficient and can produce parts with very clean and smooth edges.

Bending: Bending is a process used to shape sheet metal into curved or angular forms. This is typically done using specialized bending machines, such as press brakes, which apply pressure to the metal to achieve the desired shape. Bending is a crucial step in the fabrication of many custom parts and assemblies, as it allows for the creation of three-dimensional shapes and structures.

Specification of OEM Sheet Metal Fabrication Laser Cutting Bending Custom Parts Cabinets Manufacturer

Name	Custom OEM Laser Cutting Sheet Metal Fabrication Services Copper Stainless Steel Anodised Aluminum Metal Stamping bending Parts
Material	Zn-plating, Ni-plating, Cr-plating, Tin-plating, copper-plating, the wreath oxygen resin spraying, the heat disposing, hot-dip galvanizing, black oxide coating, painting, powdering, color zinc-plated, blue black zinc-plated, rust preventive oil, titanium alloy galvanized, silver plating, plastic, electroplating, anodizing etc.
Applications	Automotive, instrument, electrical equipment, household appliances, furniture, mechanical equipment, daily living equipment, electronic sports equipment, light industry products, sanitation machinery, market/ hotel equipment supplies, artware etc.
Packaging	Regular: Paper, Foam, OPP bag, Carton; Other: According to customers' requirements
Testing Equipment	Projecting apparatus, Salt Spray Test, Durometer, and Coating thickness tester
Tolerance	±0.01-0.05mm
Drawing	JPG, PDF, CAD, DWG, STP, STEP

Quality Control

1. Checking the raw material after they reach our factory----- Incoming quality control (IQC)
2. Checking the details before the production line operated
3. Have full inspection and routing inspection during mass production---In process quality control(IPQC)
4. Checking the goods after they are finished---- Final quality control(FQC)
5. Checking the goods after they are finished-----Outgoing quality control(OQC)

Application Of OEM Sheet Metal Fabrication Laser Cutting Bending Custom Parts Cabinets Manufacturer

1. Auto Components Hardware Parts Auto Parts
2. Communication Equipment
3. Industrial Equipment
4. Medical EquipmentsMechanical Parts
5. Ship Accessories
6. Electrical Equipment
7. Mechanical Equipment

Why Choose Us

Our promise

Stainless Steel Material

Material:

Stainless Steel 201
Stainless Steel 430
Stainless Steel 304
Stainless Steel 316

Finish:

Mirror Polishing
Brush Polishing
Electro Polishing
Vibration Polishing

FAQ

Q: How can I customize my products ?

A: Please describe your project. Include the following information so that we can provide an accurate quote: Part Name, 3D CAD Drawing, Quantity, Material, Color, Finishing.

Q: How can I know my products going on ?

A: We will offer a detailed production schedule and send weekly reports with digital pictures and videos which show the production process.

Q: Can You sign a confidentiality greement ?

A: We can sign a confidentiality agreement according to your needs.

Q: What is your terms of payment ?

A: 30% in advance ,70% balance before shipment. Other terms negotiable.

Q: Are you a trading company or factory?

A: We are direct factory with 20 experienced engineers and more than 80 employees as well approximate 3,000 square meters workshop area.

Q: What shall we do if we do not have drawings?

A: Please send your sample to our factory,then we can copy or provide you better solutions. Please send us pictures or drafts with dimensions(Length, Height, Width), CAD or 3D file will be made for you if placed order.
