

Customized CNC Turning Parts for High-Performance Industrial Machinery Metal Components Precision

Our Product Introduction

for more products please visit us on cnc-metalmachining.com

Basic Information

- Place of Origin: Shenzhen China
- Brand Name: Xianheng
- Certification: ISO9001:2015
- Model Number: TN-CNC-73
- Minimum Order Quantity: 1 pcs
- Price: USD \$0.1-\$1.99
- Packaging Details: Carton, As Customers' packaging requirements
- Delivery Time: Samples 7-10 days, Mass production 20-25 days
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 10000 pcs per week

Product Specification

- Cnc Machining Or Not: CNC Machining
- Type: CNC Milling
- Material Capabilities: Copper, Aluminum, Bronze, Stainless Steel, Brass
- Surface Treatment: Anodized, Anodizing, Anodize/natural, Sandblast, Silk Screen
- Service: OEM/ODM, OEM ODM Metal Stamping, Customized OEM OEM ODM, OEM Service
- Tolerance: 0.01mm, 0.05 Mm, +/-0.005, 0.003-0.05mm
- Application: Machinery, Automotive, Laptop, Industrial Equipment, Engineering
- Color: As Per Customers' Requirement

Product Description

What We Can Provide

Customized CNC Turning Parts for High-Performance Industrial Machinery Metal Components Precision

Description of Customized CNC Turning Parts for High-Performance Industrial Machinery Metal Components Precision

Customized CNC (Computer Numerical Control) turning parts for high - performance industrial machinery metal components are precision - engineered components specifically designed and manufactured to meet the stringent requirements of advanced industrial applications. These parts are created through a computer - controlled subtractive manufacturing process where a cutting tool removes material from a workpiece to achieve the desired shape, size, and surface finish.

Specification of Customized CNC Turning Parts for High-Performance Industrial Machinery Metal Components Precision

CNC Capacity				
CNC Machining Center	3 / 4 / 5 axis CNC Machining Centers	40+ CNC Machines		
CNC Turning	φ0.5 - φ300 * 750 mm	DIN-2768-Fine +/-0.005 mm		
CNC Machining	1270×508×635 mm(max)	DIN-2768-Fine +/-0.005 mm		
CNC Stamping	1000 * 1000 mm(max)	DIN-2768-Fine +/-0.005 mm		
Drawing Format	IGS,STP,X_T ,DXF,DWG , Pro/E, PDF			
Inspection Equipments	Measurement Instrument, Projector, CMM, Altimeter, Micrometer, Thread Gages, Calipers, Pin Gauge etc.			
Material Available				
Stainless Steel	SS201,SS301, SS303, SS304, SS316, SS416, 17-4PH, etc.			
Steel	Mild steel, Carbon Steel, 4140, 4340, Q235, Q345B, 20#, 45# etc.			
Brass	HPb63, HPb62, HPb61, HPb59, H59, H68, H80, H90 etc.			
Copper	C11000,C12000,C12000 C36000 etc.			
Aluminum	AL6061, AL6063, AL6082, AL7075, AL5052, A380 etc.			
Iron	A36, 45#, 1213, 12L14, 1215 etc.			
Plastic	ABS, PC, PE, POM, Delrin, Nylon, Teflon, PP,PEI, Peek etc.			
Surface Finishing				
Aluminum Parts	Stainless Steel Parts	Steel Parts	Copper /Brass	Plastic Parts
Clear Anodized	Polishing	Zinc plating	Polishing	Painting
Color Anodized	Passivating	Oxide black	Passivation	Chrome plating
Sandblast Anodized	Sandblasting	Nickel plating	Galvanized	polishing
Chemical Film	Laser engraving	Chrome plating	Nickel Plating	Sandblast
Brushing		Carburized	Chrome plating	Laser engraving
Polishing		Heat treatment		
Chroming		Powder Coated		

Quality Control

1. Checking the raw material after they reach our factory----- Incoming quality control (IQC)
2. Checking the details before the production line operated
3. Have full inspection and routing inspection during mass production---In process quality control(IPQC)
4. Checking the goods after they are finished---- Final quality control(FQC)
5. Checking the goods after they are finished-----Outgoing quality control(OQC)

Application Of Customized CNC Turning Parts for High-Performance Industrial Machinery Metal Components Precision

1. Auto Components Hardware Parts Auto Parts
2. Communication Equipment
3. Industrial Equipment
4. Medical EquipmentsMechanical Parts
5. Ship Accessories
6. Electrical Equipment
7. Mechanical Equipment

Why Choose Us

Our Advantages

1. Enhanced Performance and Efficiency

Customized CNC turning parts are designed to fit seamlessly into the industrial machinery, optimizing the overall performance. The precise dimensions and tight tolerances ensure that there is minimal play or misalignment between components, reducing friction and energy loss. This leads to more efficient operation of the machinery, allowing it to perform tasks faster and with less energy consumption. For example, in a high - speed rotating machinery, a precisely turned shaft can reduce vibration and noise, improving the stability and speed of the rotation.

2. Increased Durability and Longevity

The use of high - quality metals and the precise manufacturing process of CNC turning result in parts that are highly durable. These parts can withstand the harsh operating conditions of industrial environments, including high temperatures, corrosion, and mechanical stress. The customization allows for the selection of the most suitable material and the implementation of surface treatments, such as hardening or coating, to further enhance the wear resistance and corrosion protection of the components. As a result, the industrial machinery equipped with these customized CNC turning parts has a longer service life, reducing the need for frequent replacements and downtime for maintenance.

3. Improved Flexibility and Adaptability

Customized CNC turning provides the flexibility to create parts that meet the unique requirements of different industrial machinery designs. Manufacturers can easily modify the design specifications to accommodate changes in the machinery's functionality or to adapt to new market demands. This adaptability is particularly valuable in industries where innovation and rapid product development are essential. For instance, if an industrial machinery manufacturer needs to upgrade an existing machine with new features, customized CNC turning parts can be quickly designed and produced to integrate seamlessly with the existing system, minimizing the time and cost associated with a complete overhaul.

FAQ

Q1: Where can I get product & price information?

A1: Send us inquiry e-mail, we will contact you as we receive your mail.

Q2: How long can I get the sample?

A2: Depends on your specific items, within 3-7 days is required generally.

Q3: What kinds of information you need for quote?

A3: Kindly please provide the product drawing in PDF, and will be better you can provide in STEP or IGS.

Q4: What are the payment terms?

A4: We accept 50% as payment deposit, when the goods is done, we take photos for your check and you then pay the balance.

Q5: Are you a trading company or factory?

A5: We are direct factory with 10 experienced engineers and more than 650 employees as well approximate 2,000 square ft. workshop area.

Q6: What shall we do if we do not have drawings?

A6: Please send your sample to our factory, then we can copy or provide you better solutions. Please send us pictures or drafts with dimensions (Length, Height, Width), CAD or 3D file will be made for you if placed order.
