

Expertly Manufactured Brass CNC Parts for High-Precision Metal Machining by Top Brass Parts Provider

Our Product Introduction

for more products please visit us on cnc-metalmachining.com

Basic Information

- Place of Origin: Shenzhen China
- Brand Name: Xianheng
- Certification: ISO9001:2015
- Model Number: BS-CNC-070
- Minimum Order Quantity: 1 pcs
- Price: USD \$0.1-\$1.99
- Packaging Details: Carton, As Customers' packaging requirements
- Delivery Time: Samples 7-10 days, Mass production 20-25 days
- Payment Terms: T/T, Western Union, MoneyGram
- Supply Ability: 10000 pcs per week

Product Specification

- Cnc Machining Or Not: CNC Machining
- Type: Milling, Turning, Machining
- Material Capabilities: Copper, Aluminum, Bronze, Stainless Steel, Brass
- Surface Treatment: Anodized, Anodizing, Anodize/natural, Sandblast, Silk-screen
- Application: Machinery, Automotive, Laptop, Industrial Equipment, Engineering
- Tolerance: 0.01mm, 0.05 Mm, +/-0.005, 0.003-0.05mm
- Service: OEM/ODM, OEM ODM Metal Stamping, Customized OEM OEM ODM, OEM Service
- Color: As Per Customers' Requirement
- Keyword: CNC Milling Brass Parts
- Sample: Acceptable

Product Description

What We Can Provide

Expertly Manufactured Brass CNC Parts for High-Precision Metal Machining by Top Brass Parts Provider

Description of Expertly Manufactured Brass CNC Parts for High-Precision Metal Machining by Top Brass Parts Provider

Top Brass Parts Provider is a leading entity in the realm of high - precision metal machining, specializing in the creation of brass CNC parts. The company combines advanced technology, skilled craftsmanship, and a commitment to quality to produce brass components that meet the exacting demands of various industries.

Specification of Expertly Manufactured Brass CNC Parts for High-Precision Metal Machining by Top Brass Parts Provider

Business Type	CNC Machined Parts Factory / Manufacturer
Service	1. CNC Machining 2. Turning and Milling 3. CNC Turning 4. OEM Parts
Material	Aluminum: 5052,6061, 6063, 6082,7075-T etc 2. Steel: 4140, Q235, Q345B, etc. 3.Titanium: TA1,TA2/GR2, TA4/GR5, TC4, TC18,etc. 4.Stainless steel: 303,304,316L, etc. 5.Brass: C36000 , C37700 , C26800, C22000 etc 6.Plastic:Pom,ABS,Nylon,etc.
Main Equipment	CNC Machining center(Milling), CNC Lathe, Grinding machine
Treatment	Sandblasting, Anodize color, Blackening, Zinc/Nickl Plating, Polish,,Passivation PVD, Titanium Plating,Electrogalvanizing,electroplating chromium, electrophoresis, QPQ(Quench-Polish-Quench),Electro Polishing,Chrome Plating, Knurl,Power coating,Laser etch Logo,
Tolerance	±0.01mm~±0.05mm
Drawing format	STEP,STP,IGES,CAD,PDF,DWG,DXF etc or samples.

Application Of Expertly Manufactured Brass CNC Parts for High-Precision Metal Machining by Top Brass Parts Provider

1. Auto Components Hardware Parts Auto Parts
2. Communication Equipment
3. Industrial Equipment
4. Medical EquipmentsMechanical Parts
5. Ship Accessories
6. Electrical Equipment
7. Mechanical Equipment

Quality Control

1. Checking the raw material after they reach our factory----- Incoming quality control (IQC)
2. Checking the details before the production line operated
3. Have full inspection and routing inspection during mass production---In process quality control(IPQC)
4. Checking the goods after they are finished---- Final quality control(FQC)
5. Checking the goods after they are finished-----Outgoing quality control(OQC)

Why Choose Us

Advantages

1. Unmatched Precision and Consistency

The CNC machining process employed by Top Brass Parts Provider guarantees unmatched precision and consistency in the production of brass parts. Each part is manufactured to the exact same specifications, ensuring a perfect fit and function when used in assemblies. This is particularly crucial in industries like aerospace and medical devices, where even the slightest deviation can lead to catastrophic failures. The high - precision CNC machines can achieve tolerances that are difficult to attain with traditional manufacturing methods, resulting in components that operate with maximum efficiency and reliability.

2. Enhanced Durability and Longevity

The high - quality brass alloys used by Top Brass Parts Provider, combined with the precise machining process, result in brass CNC parts that exhibit enhanced durability and longevity. Brass is inherently resistant to corrosion, making it suitable for use in harsh environments. The accurate machining ensures that there are no stress concentrations or weak points in the parts, which can lead to premature failure. This means that the brass CNC parts can withstand heavy loads, repeated use, and

exposure to various elements without significant wear and tear, reducing the need for frequent replacements and associated costs.

3. Customization to Meet Unique Requirements

Top Brass Parts Provider understands that every client has unique requirements. The CNC technology allows for a high degree of customization in the production of brass parts. Whether it's a complex shape, a specific surface finish, or a particular dimension, the company can tailor the manufacturing process to meet the client's needs. This flexibility is especially valuable for businesses that are developing new products or require specialized components for their existing operations. The ability to quickly produce prototypes and make modifications as needed also speeds up the product development cycle.

4. Cost - Efficiency in the Long Term

While the initial investment in CNC - machined brass parts may be higher compared to some alternative manufacturing methods, Top Brass Parts Provider's products offer significant cost - efficiency in the long term. The high precision and quality of the parts reduce the likelihood of defects and rework, saving time and money during the assembly process. Additionally, the durability of the brass CNC parts means that they have a longer service life, reducing the need for frequent maintenance and replacement. This results in lower overall costs for the client over the product's lifecycle, making it a cost - effective solution for a wide range of applications.

FAQ

Q1: Where can I get product & price information?

A1: Send us inquiry e-mail, we will contact you as we receive your mail.

Q2: How long can I get the sample?

A2: Depends on your specific items, within 3-7 days is required generally.

Q3: What kinds of information you need for quote?

A3: Kindly please provide the product drawing in PDF, and will be better you can provide in STEP or IGS.

Q4: What are the payment terms?

A4: We accept 50% as payment deposit, when the goods is done, we take photos for your check and you then pay the balance.

Q5: Are you a trading company or factory?

A5: We are direct factory with 10 experienced engineers and more than 650 employees as well approximate 2,000 square ft. workshop area.

Q6: What shall we do if we do not have drawings?

A6: Please send your sample to our factory, then we can copy or provide you better solutions. Please send us pictures or drafts with dimensions (Length, Height, Width), CAD or 3D file will be made for you if placed order.
