

Precision-Crafted CNC Turned Components Engineering Excellence in Axial Symmetry

Basic Information

Place of Origin: Shenzhen China
Brand Name: Xianheng
Certification: ISO9001:2015
Model Number: TN-CNC-91
Minimum Order Quantity: 1 pcs

• Price: USD \$0.1-\$1.99

Packaging Details: Carton, As Customers'packaging

requirements

• Delivery Time: Samples 7-10 days, Mass production 20-25

days

• Payment Terms: T/T, Western Union, MoneyGram

Supply Ability: 10000 pcs per week

Product Specification

Cnc Machining Or Not: CNC MachiningType: CNC Milling

• Material Capabilities: Copper, Aluminum, Bronze, Stainless Steel,

Brass

• Surface Treatment: Anodized, Anodizing, Anodize/natural,

Sandblast, Silk Screen

Service: OEM/ODM, OEM ODM Metal Stamping,

Customized OEM OEM ODM, OEM Service

Tolerance: 0.01mm, 0.05 Mm, +/-0.005, 0.003-0.05mm
 Application: Machinery, Automotive, Laptop, Industrial

Equipment, Engineering

Color: As Per Customers' Requirement

Product Description

What We Can Provide

Precision-Crafted CNC Turned Components Engineering Excellence in Axial Symmetry

Description of Precision-Crafted CNC Turned Components Engineering Excellence in Axial Symmetry

CNC turning is a subtractive manufacturing process that excels in producing axially symmetric components with unparalleled precision. By rotating a workpiece on a spindle while a cutting tool shapes it, this method ensures consistent dimensional accuracy and surface finish. Ideal for parts like shafts, bushings, valves, and medical implants, CNC turning combines advanced software control with automated tooling to achieve tight tolerances (often ±0.001 mm or better). Its strength lies in handling complex geometries, high-volume production, and materials ranging from metals (steel, aluminum) to engineering plastics.

Specification of Precision-Crafted CNC Turned Components Engineering Excellence in Axial Symmetry

0/4/5 : 02/0			
3 / 4 / 5 axis CNC Machining Centers		40+ CNC Machines	
φ0.5 - φ300 * 750 mm		DIN-2768-Fine +/-0.005 mm	
1270×508×635 mm(max)		DIN-2768-Fine +/-0.005 mm	
1000 * 1000 mm(r	1000 * 1000 mm(max) DIN-2768-Fine +/-0.005 n		ne +/-0.005 mm
IGS,STP,X_T ,DX	IGS,STP,X_T ,DXF,DWG , Pro/E, PDF		
Measurement Instrument, Projector, CMM, Altimeter, Micrometer, Thread Gages, Calipers, Pin Gauge etc.			
SS201,SS301, SS303, SS304, SS316, SS416, 17-4PH, etc.			
Mild steel, Carbon Steel, 4140, 4340, Q235, Q345B, 20#, 45# etc.			
HPb63, HPb62, HPb61, HPb59, H59, H68, H80, H90 etc.			
C11000,C12000,C12000 C36000 etc.

Quality Control

- 1. Checking the raw material after they reach our factory----- Incoming quality control (IQC)
- 2. Checking the details before the production line operated
- 3. Have full inspection and routing inspection during mass production---In process quality control(IPQC)
- 4. Checking the goods after they are finished---- Final quality control(FQC)
- 5. Checking the goods after they are finished----Outgoing quality control(OQC)

Application Of Precision-Crafted CNC Turned Components Engineering Excellence in Axial Symmetry

- 1. Auto Components Hardware Parts Auto Parts
- 2. Communication Equipment
- 3. Industrial Equipment
- 4. Medical EquipmentsMechanical Parts
- 5. Ship Accessories
- 6. Electrical Equipment
- 7. Mechanical Equipment

Why Choose Us

Our Advantages

Unmatched Precision & Consistency

CNC machines eliminate human error, ensuring every part meets exact specifications. This is vital for industries like aerospace, where component failure can be catastrophic.

Cost-Effective High-Volume Production

Once programmed, CNC turning operates continuously with minimal supervision, reducing labor costs and lead times. This makes it ideal for mass manufacturing of standardized parts.

Material Versatility

The process works with diverse materials, including hardened steels, titanium, and polymers, allowing engineers to select materials based on performance needs (e.g., corrosion resistance, weight).

Rapid Prototyping & Customization

Software adjustments enable quick design iterations without retooling. This flexibility supports prototyping and low-volume custom orders, accelerating product development cycles.

FAQ

Q1: Where can I get product & price information?

A1:Send us inquiry e-mail, we will contact you as we receive your mail.

Q2: How long can I get the sample?

A2:Depends on your specific items, within 3-7 days is required generally.

Q3: What kinds of information you need for quote?

A3:Kindly please provide the product drawing in PDF, and will be better you can provide in STEP or IGS.

Q4: What are the payment terms?

A4: We accept 50% as payment deposit, when the goods is done, we take photos for your check and you then pay the balance.

Q5: Are you a trading company or factory?

A5:We are direct factory with 10 experienced engineers and more than 650 employees as well approximate 2,000 square ft. workshop area.

Q6: What shall we do if we do not have drawings?

A6:Please send your sample to our factory, then we can copy or provide you better solutions. Please send us pictures or drafts with dimensions (Length, Hight, Width), CAD or 3D file will be made for you if placed order.
